# Ken Everest Nunes

Philadelphia, PA | 2676888038 | kennunes77@gmail.com | linkedin.com/in/ken-nunes-5694241a3

## SUMMARY

Software engineer with an M.S. in Computer Science from Drexel, one year of full-time development experience, and an Amazon SDE internship. Builds full-stack applications and AI tools using Python, JavaScript, and AWS, with a focus on reliability and solving practical problems.

## EDUCATION

**Drexel University** Philadelphia, PA
Master of Science in Computer Science (Graduated: June 2026) GPA: 3.91 / 4

**Mumbai University** Mumbai, India
Bachelor of Engineering in Computer Engineering (Graduated: June 2023) GPA: 3.8 / 4

## EXPERIENCE

**Amazon.com Services LLC** | *SDE 1 Intern* | *Jun 2025 - Oct 2025* Bellevue, WA

- Designed and deployed a production backend service for automated ticket resolution using **AWS Bedrock and Lambda**, reducing engineering workload by **31%** through reliable automation.
- Provisioned and automated **AWS infrastructure using CDK**, implementing **Linux-based development workflows, least-privilege IAM policies**, and deployment configurations for production AI services.
- Implemented a **confidence-scoring and classification layer** with validation safeguards to prevent unreliable automated resolutions and improve system reliability.

**Rajkamal Barscan Systems Pvt Ltd** | *Software Developer* | *Jun 2023 - Jul 2024* Mumbai, India

- Developed **React interfaces** and **Node.js/Express and Django REST APIs** serving **1K+ monthly users** across customer-facing and internal applications.
- Optimized **Python REST APIs**, MySQL, and Redis caching strategies, reducing **API latency by ~40%** and improving throughput for high-frequency workloads
- Implemented **JWT authentication and RBAC**, wrote automated tests using **Pytest and Jest**, and investigated production issues to improve application security and reliability.

## PROJECTS

**MCP Sentry** | *Python, MCP SDK, Docker, Pytest*

- Developed a **Python MCP testing tool** with **asynchronous tool discovery** and **schema-driven fuzzing** to test input validation and error handling.
- Designed **Docker-isolated test runs** and an evaluation engine to detect **crashes, timeouts, and configured data leaks** across mock MCP servers.

**Predicting Heavy Review Cycles in AI-Generated Pull Requests** | *Python, Scikit-Learn, XGBoost*

- Trained an **XGBoost classifier** on **33K pull requests** from GitHub repositories with 100+ stars to predict review friction in AI-generated code.
- Achieved **86% classification accuracy** and **81% recall** for high-friction pull requests.

**Voice-Controlled AI Assistant** | *Node.js, React, Groq SDK, Vapi, Webhooks*

- Built an **AI scheduling assistant** supporting **chat and voice interactions** using **Node.js, React, Groq SDK, and Vapi webhooks**, with **automated confirmation emails**.
- Preserved **conversation context** when switching from chat to **voice**, allowing users to continue scheduling without repeating previous details.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, TypeScript, Java.
**Frameworks & Libraries:** React, Node.js, Express, FastAPI, Django, Redux, Pytest, Jest.
**Cloud & Systems:** AWS CDK, Lambda, CloudWatch, Docker, Linux, REST APIs, WebSockets, Redis, Git.
**AI & Data:** Amazon Bedrock, RAG, Scikit-learn, XGBoost, Groq SDK, MCP SDK, MySQL, MongoDB.
